

## The next generation RIS system

Login Diagnostics® is a Radiology Information System designed to simplify working of a diagnostics center. It is an innovative solution aimed at managing the vast pool of patient data and medical images data available at a diagnostics center. It supports the working routines of radiologists and clinicians and provides on-demand access to all the medical data even across geographically separated units. It is a modular and scaleable system with capabilities to manage multiple clinics from a single location.

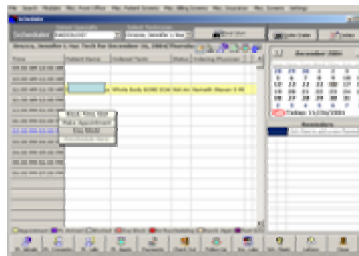

## Features

- Intuitive user interface
- Multi-center, multi-procedures and multi-facility scheduling
- Easily customizable
- Quickly create customized & comprehensive reports
- Point and Click documentation wizard
- Self-Customizable documentation templates
- HIPAA compliant billing and claims management
- Submit claims within hours of seeing patient
- Eliminate time spent on billing
- Electronic claims submission and Remittance advices

## Better workflow; better care

Login Diagnostics® enables radiology clinics to be more productive by reducing repetitive, redundant and labor intensive tasks. With a comprehensive scheduler it can keep track of all patient appointments, reminders and patient demographics. Point of care billing creates medical claims in minutes which can be submitted electronically. The intuitive interface makes it easy to learn and even to train new employees on the system functionalities.

*Login Diagnostics intuitive interface makes it easy to learn and to train new employees*

## System Options

- *Diagnostics Scheduling*
- *Physician/Technician documentation*

### Login Diagnostics

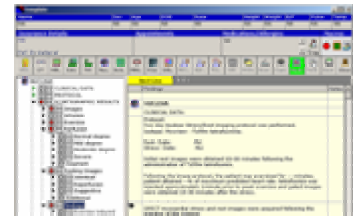

- *Complete Product*

### Login Diagnostics Nuclear

*Embedded product within MEDX offering*

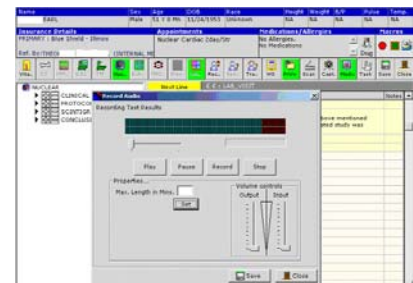

## Templates make reporting & documentation a breeze

The Login Diagnostics® Point and Click template system makes it very easy to document Diagnostic test results. An

exhaustive template library is *Login Diagnostics templates make documentation quick and easy*

included with the application. Users can customize these templates or create their own to suit their documentation style. As clicks are applied, the documentation is automatically prepared and is added to the electronic medical record of the patient.

*Documentation using voice recording*

For traditional providers, the system allows transcription facility using MP3 recording. A technician can listen to it and complete the documentation using Point and Click functionality.

## Why choose Login Diagnostics?

### Maximum return on investment

Login Diagnostics® provides a state of the art RIS solution that is self-customizable for your specific needs at competitive prices. The powerful software runs on a range of readily available personal computers, minimizing your initial investment and ensuing maintenance costs. It helps the center reduce overhead costs by improving efficiency and enables increased revenue by ensuring no bill is lost. Its comprehensive Claims module helps in tracking unpaid claims and eases the follow-up thus reducing accounts receivable days.

### Implementation and Training

The workflow and documentation templates are self customizable. Before installation at your diagnostics center, we set-up the system to incorporate center specific parameters. Further customization of templates and many other features is easy and can be done on the fly for all users or for each individual user.

We provide comprehensive user training to ensure users are able to operate the system without hesitation. As most implementations fail due to lack of training, we have devised a methodology that combines class-room as well as hand-on training.

LoginClinic, Inc. is dedicated to provide quality solutions for medical practitioners in their endeavor to provide consistent and quality patient care. We aim to provide technology and management solutions to enable their (& their practice's) compliance with best practices in clinical management resulting in enhanced patient care, improved business results and a positive change in their lifestyle.

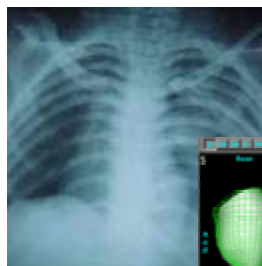

### Customer Care

We are dedicated to ensure that your center is running smoothly at all times. To ensure that, we have developed a support infrastructure that enables us to swiftly respond to your support needs. Our Customer Care professionals are available on phone, email, and for on-site resolution of any problem that may occur. Our customer care website has quick links for FAQ and work around solutions.

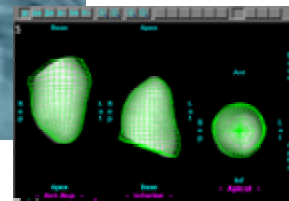

We constantly update the system with new features and templates. We provide regular updates for CPT and ICD9 codes. As new release of software becomes available we automatically upgrade for all supported customers.

### Dedication to development

We are constantly enhancing the system to meet and exceed the demands of today's clinics. Healthcare IT is a constantly evolving field with which we keep ourselves up to date through research, consultation with healthcare and fellow IT professionals and update our software through a dedicated team of developers.

Store any type of medical data with Login Diagnostics
